

translation

cytoplasmic translation

translational
initiation

translational elongation	

response to oxidative stress

maturation of
SSU-rRNA from
tricistronic rRNA
transcript (SSU-rRNA,
5.8S rRNA, LSU-rRNA)
riboso

ribosomal
large subunit
assembly

ribosomal
small subunit
biogenesis

small ribosomal subunit assembly

maturation of LSU-rRNA
from tricistronic rRNA
transcript (SSU-rRNA,
5.8S rRNA, LSU-rRNA)

regulation of translation involved in cellular response to UV

establishment of skin barrier

positive regulation of
intrinsic apoptotic
signaling pathway in
response to DNA damage
by p53 class mediator

glycerol
transmembrane
transport

positive regulation of saliva secretion

**cellular
response to
ethanol**

pantothenate
metabolic
process

nitric oxide
transport

regulation of translational fidelity	negative regulation of ferroptosis
